PROPOSALS

CONGRESS THEME

The very theme of the Congress, “Nature<>Nurture – challenges for a 3rd millennium Infant Mental Health” indicates that, while knowledge on the basic determinants of child development is increasingly accurate and sophisticated, each of us bears the responsibility to promote, protect and guarantee a development that is human under every respect.

From the possibilities provided by genetic engineering to the ongoing tragedy affecting migrant children and their families, we have to be ready to act in favour of the best interest of children in the light of both scientific knowledge and ethical awareness.

WAIMH MISSION

WAIMH's mission promotes education, research, and study of the effects of mental, emotional and social development during infancy on later normal and psychopathological development through international and interdisciplinary cooperation, publications, affiliate associations, and through regional and biennial congresses devoted to scientific, educational, and clinical work with infants and their caregivers.
